The most powerful, effective and mobile solution on the market

# Pure-matic Ball Cleaner

## The most powerful, effective and mobile solution on the market

Annexe D of BS 8409 is the British Standard Code of practice for Indoor Play Areas, and together with RoSPA they recommend regular cleaning of playpen balls. Thanks to the **Pure-matic BBW2026** system, it provides the fastest and most efficient solution on the market today. In fact research by the faculty of Chemistry, Environment and Technics of Usselland University, have concluded that the balls benefit a reduction of 75% of bacteria without even using any cleanser or disinfecting fluid and eliminates over 95% of Microbes using the supplied cleaning fluid.

### The Pure-matic latest model updates:

- Chassis increased from 100cm to 115cm for better ergonomics
- Improved safety cut-outs for both suction and wash units
- Relocation of suction unit power socket for less liable damage
- Addition of protection bumper to protect from damage
- Overall weight reduction down to just now 60Kg
- Elimination of tablets to more efficient liquid detergent
- 1 year warranty can be extended by an additional 4 years

This state-of-the-art machine has evolved over 30 years since its launch in 1994 and has been purpose built to address the problems involved in cleaning children's ball pools.

The Pure-matic sanitisation system is a powerful, effective and mobile solution suitable for any size of play area, large or small.

### Advantages

- Able to clean up to 15,000 balls per hour
- Capable of bagging up to 50,000 balls per hour
- Designed to fit through a standard doorway
- Lightweight and mobile
- Built to Industrial standards for better reliability and endurance
- Unique ball sanitisation system
- Supplied with a 5.0m hose, 25 netsacks, 2 towels and detergent
- Standard brushes suitable for 75-80mm balls
